On-Camera Skills Workshop Course Description

On-Camera Skills Workshop is a one-day program designed to provide participants with the skills and techniques necessary to plan and present a successful video program. This workshop focuses on preparing and presenting an on-camera video shoot. Regardless of your presentation topic, you will learn numerous tips and tricks to make your on-camera presentations look smooth and professional.

Who should attend this workshop?

Any individual who is required to prepare and present material before a video camera can benefit from this workshop.

Topics include:

Presentation Planning
Content Organization
Production Techniques
Video Program Rehearsal
Video Presentations
Program Analysis and Reviews

Description:

The day is divided into two sections.

- In the morning, we cover planning, development and production techniques.
- In the afternoon, participants present, analyze and review their video programs.

You need to bring to the workshop all the supplies and materials needed for the on-camera presentation. You will have plenty of on-camera practice during the workshop.

Each participant will have his or her presentation videotaped and reviewed during the workshop and will receive a DVD copy of his or her video presentation to take home.
